DETAILED ACTION

- I. Rejection of claims 1,6-8, 10-12 under 35 USC 112, 1st paragraph as failing to comply with the written description requirement will be maintained in light of amendment filed 12/27/06 for reason on record and reason as follows. Applicant argues that ratios (1:1 and 2.5:1) in the claims are derived from specific examples in the specification. Applicant argues that the MPEP allows for the use of data points from the specific examples in the specification as amended endpoints. Examiner agrees that the MPEP supports the employment of parameters from the examples into the claims. However, Examiner argues that the MPEP does not support the creation of ratio endpoint ranges from percentage data points used in the examples. Note, Claim 9 is not included in this rejection since support for range, 375:1 to 1:6, is provided on page 1 line 28 of the specification.
- II. Rejection of claims 1,6-8,10-12 under 35 USC 103(a) as being obvious over Yamaguchi will be maintained in light of amendment filed 12/27/06 for reason on record and reason as follows. Applicants argue that they have obtained unexpected synergistic interaction between MIT and MBI in the claimed range ratios and that Yamaguchi contains no data illustrating any synergistic interaction at any ratio. Examiner acknowledges applicants' data obtained from the combination of MIT:MBI in a ratio of 1:1. However, Examiner reiterates that Yamaguchi discloses MIT:MBI in a ratio of 1:1.33. However, it would have been obvious to one having ordinary skill in the art to employ the ratio (1:1) claimed by

Art Unit: 1616

applicant since it is so close to the claimed ratio (1:33) taught by Yamaguchi. In the absence of unexpected results, one having ordinary skill in the art would have been motivated to do this because the 1:1.33 for MIT:MBI is extremely close to and rounds off to the claimed ratio of 1:1 for MIT:MBI. One would have expected data collected using both ratios to be similar due to the closeness of the claimed ratio and Yamaguchi's ratio.

Allowable Subject Matter

Claims 3-5,9 are allowable. Applicant provides synergistic results for compositions comprising alkyl-4-isothiazolin-3-one and dithiobis(N-methylbenzamide).

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
